

Increase Safety with a quick temperature check!

To ensure that people entering a location are not running a high temperature, **Sweet Sound** introduces new infrared temperature sensor/detector. It provides alerts when a person is running a high temperature in less than 3 seconds.

The system uses an advanced algorithm for detecting and calculating heat signatures. Based on technology developed in Germany, the highly accurate sensor measures with a tolerance of:

+/- 0.5 degrees Celsius (+/- 0.9 degrees Fahrenheit).

Why a temperature sensor?

- Provides the first layer of screening protection
 - More hygienic with non-touch infrared technology
 - Multiple devices can be monitored by a single user

*TTS panel shown with optional
WMT-1 wall mount*

*TTS panel shown with optional
APS-1 pole stand*

Specifications:

- Scan distance: 0.5 to 1 meter (approx. 1' 8" to 3' 3")
- Accuracy: +/- 0.5°C (+/- 0.9°F)
- Scan speed: within 3 seconds
- Screen Sizes are 10.1", 15.6", and 21.5" models
- Quad-core 1.8Ghz processor
- WiFi and PoE Ethernet
(PoE on 10" & 15" models only)
- VESA compatible mounting

Options

- APS-1 adjustable pole stand with weighted base
- WMT-1 VESA wall mount
- Future firmware upgrade options
- Photo & thermal result email alerts
- Facial recognition
- Customized flagging
- ReAX control
- Integration with third-party control and access systems

Sweet Sound is currently accepting Pre-Orders, Supply is already limited, first come first served! Please, **Get your order in before Las Vegas buys them all up!**

Installation can be scheduled anytime after your initial order has been placed!

Why a temperature sensor?
